WHY IT WORKS.

Medical grade silicone has long been used in the medical industry to treat scarring. Now, Wrinkles Schminkles has harnessed the power of silicone so you can treat your wrinkles!

1 Keeps skin taut so it can't crease or wrinkle

When you apply Wrinkles Schminkles Silicone Pads, the skin cannot crease to cause the wrinkles. The pads are kept in place using a medical grade silicone adhesive. It's that simple!

2 Silicone creates hydration and moisture

Doctors use silicone sheets to prevent and treat the appearance of scars. Our Silicone Pads work the same way – with the healing properties of the medical grade silicone creating hydration and smoothing wrinkles.

3 Increased bloodflow can stimulate collagen

The placement of the Silicone Pad on your skin brings blood flow to the surface, which can help to stimulate collagen – visibly softening wrinkles while you sleep.

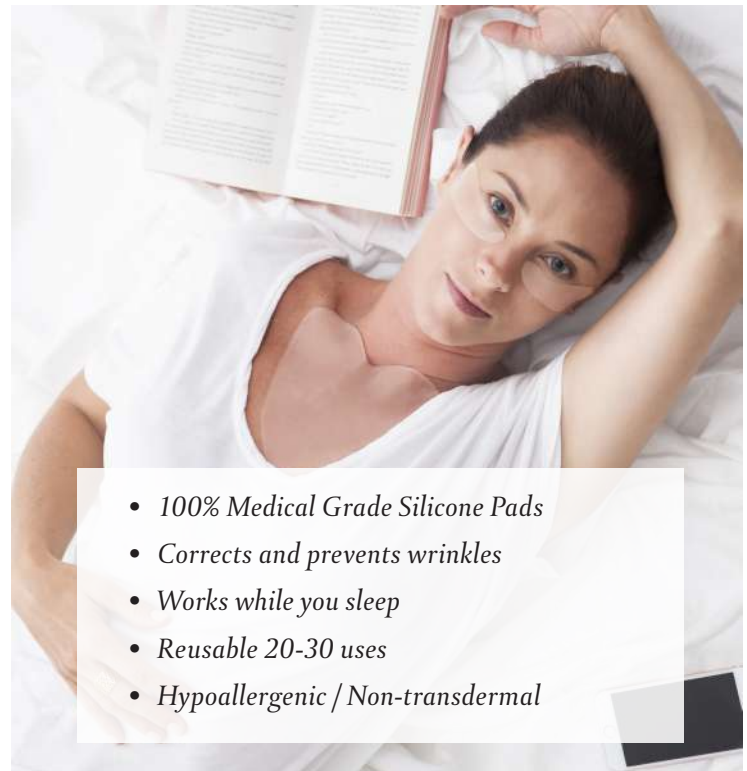

HOW TO USE THEM.

1 Thoroughly wash and dry skin keeping it free of creams or serums to enable the Silicone Pad to adhere properly.

2 Peel the plastic film from the Silicone Pads and apply to skin – adhesive side down.

3 Get your beauty sleep!

4 Gently peel off the Silicone Pads and stick it face down on the plastic storage sheet included in your packaging.
